PROFESSIONAL SUMMARY

Product Designer (UX/UI) with **2+** years bridging design and front-end engineering across SaaS platforms, data-heavy dashboards, and client-facing web and mobile products (**10+** shipped). Specialize in design systems, high-fidelity prototyping, information architecture, and translating complex flows into scalable, accessible, component-driven UI. Partner closely with engineers to ship pixel-accurate experiences from problem framing through developer handoff.

EXPERIENCE

Associate Product Designer — Upgame (Golf Technology Platform)

Full-Time | Feb 2026 – Present

- Architected end-to-end UX/UI for golf performance-tracking software, delivering **8+** analytics dashboards and match-tracking flows that make complex play data readable for coaches and players.
- Streamlined analytics workflows by recognizing patterns, cutting the steps to interpret key performance metrics by **~40%**.
- Produced **20+** reusable marketing creatives and product-communication templates while collaborating daily across **3** teams (product, engineering, and marketing).

UX Designer — Qyverra Technologies (Software Development Agency)

Full-Time | Nov 2025 – Jan 2026

- Led UX for **5+** client products across the legal, education, and content-management domains, owning research, information architecture, and high-fidelity UI.
- Delivered **30+** user flows and responsive high-fidelity screens, partnering with developers on design handoff and QA to ensure faithful, on-spec implementation.
- Standardized a library of **40+** reusable UI components, accelerating delivery across **3+** concurrent client engagements by **~25%**.

Product Designer — AdvoAI (Legal Tech Platform)

Full-Time | Dec 2024 – Oct 2025

- Shipped core product workflows for lawyer discovery, client-to-lawyer matching, and AI-powered legal guidance, supporting **1,000+** platform users.
- Prototyped a conversational chatbot and location-based navigation flows that cut the time to find and connect with a lawyer by **~35%**.
- Built a scalable UI pattern library spanning web and mobile, reducing new-feature design time by **~30%**.

SELECTED PROJECTS

Law Firm SaaS Dashboard (Web & Mobile)

- Engineered role-based dashboards for **3** user types (lawyers, interns, and clients) within a single SaaS workflow, tailoring views and permissions to each role.
- Developed data tables, advanced filtering, and search handling **500+** case records to support high-volume, day-to-day operations.

Coach Performance Dashboard

- Created analytics dashboards with side-by-side comparison of up to **4** athletes and shared filters for multi-athlete tracking.
- Applied information architecture and data-visualization best practices that improved speed of insight by **~30%** in usability testing.

SKILLS

Design: User Research, Information Architecture, User Flows, Usability Testing, Wireframing, Prototyping, Interaction Design, Journey Mapping

Design Systems & UI: Design Systems, Design Tokens, Component Libraries, Visual Design, Responsive Design, Micro-interactions, Data Visualization, Dashboard Design, Accessibility (WCAG)

Engineering & Handoff: Design-to-Code Handoff, Figma Dev Mode, HTML & CSS, Design QA, Rapid Prototyping, Engineering Collaboration

Tools: Figma, Framer, Adobe XD, Illustrator, Miro, Smartlook, Google Workspace

EDUCATION

Delhi Technological University

Bachelor of Design (B.Des), Product Design | 2021 – 2025 | CGPA: 8.4
